CHALLENGES ⌄

- Dispel myths around over booked spaces and fully utilised
- Reduce complaints on space unavailability for mobile users
- Limited data on how long employees spend in the office or what assets they interacted with
- Avoid additional office space investments if not necessary

SOLUTION ⌄

Utilisation analytics software

Gathering accurate desk and meeting room occupancy and utilisation data for better visibility of under and over utilised workspaces to action optimisation strategies.

Easy to use dashboard

Automated reports

24hr access to data

BENEFITS ⌄

1 **Rightsizing meeting rooms**
Supporting office productivity and collaboration by leveraging meeting room utilisation data to validate and compare actual usage of large vs small rooms.

2 **Adapting workstyles**
Supporting departmental leaders to build a case to move from mobile to e-working by identifying when employees' workstyles are modelled incorrectly.

3 **Seamless office returns**
Monitoring trends to better understand how employees will interact with workspaces post pandemic in order to action short term changes and ensure the office runs efficiently.

4 **Insight led conversations with stakeholders**
Stronger influence in discussions and decisions with departmental stakeholders and leadership teams on how best to optimise and utilise underused workspaces.
